Chronograph II S  
Instruction manual

## Instruction manual

### 1. Winding the watch

If the watch has stopped, you should turn the winding crown in the basic position (position 1) at least 30 times clockwise to ensure correct function and good accuracy. Wearing the watch permanently at your wrist winds up the movement automatically.

### Settings for the watch winder:

Turns per day: 800

Direction of rotation: right and left

### 2. Setting the time

- Pull the winding crown (position 2), in this position the second hand stops and the accurate time can be set.
- 
- 

### **3. Functions**

#### **Push buttons**

All the functions of the Chronograph are controlled through 2 push buttons.

Push button 1 has two functions: Start und Stop

Push button 2 has the function: Reset

#### **Function: Start**

When you need to measure a specific event you must remember to reset the chronograph hands.

If the measuring period is initiated you have to push the button 1 - Start.

The seconds counter hand in the centre is moving forward.

#### **Function: Stop**

When the timed event is over you once again push the button 1. The chronograph hands stop, you can read the result. The seconds can be read out at the centre, the minutes at the "3-o'clock" position and the hours at the "6-o'clock" position.

#### **Function: Reset**

The chronograph hands have to be returned to the starting position, by pushing the button 2. The reset can be done only when the Chronograph is stopped.

A measurement can have the maximum length of 12 hours.
